Phone: (307) 633-4302 Email: permits@laramiecountywy.gov
Hours of Operation: Mon – Thurs, 6:00 am – 4:30 pm

UTILITY PERMIT SPECIAL CONDITIONS

1. The facility will be placed in a manner conforming to recognized standards, applicable federal, state, or local laws, codes, ordinances, and regulations, and as specified in the latest edition of the Wyoming State Highway Department Utility Accommodation Regulation, in the exact location shown on the attached construction drawings. Placing the facility in a location other than originally approved without obtaining prior County approval by submitting revised drawings may void the permit. The construction drawings clearly show the facility's alignment, grade, vertical and horizontal clearances, types of material, operating pressure and/or capacity, roadway location, as well as dimensions from the proposed facility to the roadway and/or right-of-way line, which by this reference is made a part thereof. Any future alterations, modifications, or removals of the facility within the right-of-way, required and requested by the County, shall be completed immediately. Adjustments will be accomplished at no expense to the County, unless otherwise provided by law, if such adjustments are required for public use of the roadway.
2. The permit is pursuant to W.S.§1-26-813 and grants permission for the Owner/Permittee to occupy a portion of the right-of-way controlled by the County. The type of controlling interest held by the County limits this permission. Responsibility to satisfy any other fee (deeded) interest rests with the Owner/permittee.
3. Permittee shall notify the County in writing thirty (30) days before any transfer, modification, or assignment of this permit. The permit does not allow for installation of additional facilities, nor does this permit set aside a strip of land of specific width for the exclusive use by the Owner/permittee. Minor repairs, minor additions to existing equipment and routine maintenance are permissible without additional permitting provided that prior notification is made to the County, except in emergencies where notification is not feasible. The Owner/permittee is required to notify the County in writing to cancel and/or nullify any issued permit if the described facility is to be abandoned in place, will be removed, or will not be constructed. The County will determine if abandonment in place will hinder the County's future operations and if the facility must be removed at the time of abandonment.
4. The Owner/permittee agrees to the standards for traffic control as outlined in the "Manual on Uniform Traffic Control Devices", including supplements. Standards developed by the Owner/permittee may be substituted for the cited manual provided the County has approved them. The Owner/permittee must cease all operations if he does not comply with traffic control standards. If lane or road closures are anticipated, traffic control plans will be submitted to the County for approval prior to starting any work within County right-of-way. No work shall begin in County right-of-way until all traffic control devices and personnel are in place.
5. The Owner/permittee claims no property rights in and to the public road being used for its fixtures and facilities. If the Owner/permittee fails to comply with the provisions of this permit as accepted, the Owner/permittee agrees to pay all reasonable damages proximately caused by such failure as actually incurred by the County. The Owner/permittee shall hold harmless Laramie County and all its representatives from all suits, actions or claims of any character, brought on account of any injuries or damages sustained by any person(s) or property in consequence of any act(s) caused by construction by the Owner/permittee, contractor(s), their employees or representatives.
6. The County may attach specific construction considerations that may be required for public use of the roadway to this form. The Owner/permittee agrees to incorporate such requirements into the design of the facility and assures compliance with these requirements during the construction of the facility. Non-compliance will void this permit. This requirement is not intended to supplant the authority of the Public Service Commission.
7. Based upon the complexity, construction methods or other concerns, the County may assign inspector(s) to the project. The County will notify the Owner/permittee at the time of permit issuance of the assignment of an inspector and provide the Owner/permittee with an estimated cost at the expense of the Owner/permittee. The Owner/permittee, Contractor(s), their employees, agents or representatives shall have in their possession a copy of the Utility Permit at the job site. The Owner/permittee shall notify the County prior to beginning and completion of work.
8. The Owner/permittee is hereby advised that any work operation in the vicinity of electric power lines shall comply with W.S.§37-3-301 through 37-3-306, titled Wyoming High Voltage Power Lines and Safety Restrictions Act, and the Owner/permittee is further advised to comply with the provisions of W.S.§37-12-304, titled Damage to Underground Public utilities Facilities.
9. The Owner/permittee agrees to comply with all federal, state, and local laws/regulations.
10. The Owner/permittee agrees to ongoing maintenance of the facility placed in the right-of-way at the expense of the Owner/permittee.
