Sketch

This is to amended ELEVATION CERTIFICATE previously prepared and signed by myself, dated 5-11-2012.

Two items requiring amendment:

1. I incorrectly checked item B10 for the BFE being a "FIRM" elevation, when in actuality I should have checked "OTHER". The flood Zone A as shown on the referenced FEMA MAP/PANEL for the subject site is defined as "No Base Flood Elevation determined". The BFE was determined by myself using the Zone A estimates provided on said MAP/PANEL, and I then located said positions on the ground and observed the actual elevations. These positions and elevations appeared to reasonably represent the flood plain estimates provided. And the finish floor elevations were constructed to exceed said elevations.
2. The second amendment provided is a change in items C2.a), E1.a), and E1.b) wherein the finish floor elevation was changed to 6173.03. When I did my previous ELEVATION CERTIFICATE, the finished floor was a gravel base elevation. The owner has since paved the floor of the barn with a 4" thick concrete pad.
