Mr Mark Reid, Director Laramie County Planning Office 310 West 19th Street Cheyenne WY 82001

RE:

John Eastman

613 East Ole Maverick Road Floodplain Location Determination

Given the "Best Available Information" is the Child's Draw - North Cheyenne, Wyoming - Detailed Floodplain Study prepared by the Wyoming Department of Transportation, January 16, 2002; and, the local aerial topographic mapping with 2-foot contour interval prepared March 1994 is appropriate in lieu of the information shown on the Flood Insurance Rate Map (FIRM) 560029-0505 D, Revised 9-27-91, my analysis of actual site information and elevations indicates that both the existing dwelling and the proposed garage/shop building are above the Base Flood Elevation determined by the WYDOT study.

The analysis included the 100-yr Base Flood Elevations (BFE) at River Stations 23228, 23578, 23757 and 24160 being 6172.8, 6172.8, 6173.4 and 6178.0, respectively, as reported in the WYDOT study. Field data confirms the contour elevation information shown on the local aerial topographic mapping (also used by WYDOT). Transferring this elevation data, intensively, to the actual site results in the floodplain limits shown on the site plan submitted separately by Mr Eastman. As you can see, the site is located on top of a slight ridgeline or knob that may have been of such slight significance that the detail level of the WYDOT study was such that the elevation differential in the vicinity of the site was not apparent. In any event, the existing and proposed site improvements are above the Base Flood Elevation.

I trust the site plan and attached FEMA "Elevation Certificate", Form 81-31, FEMA Form 81-93 will adequately address your need and any concern in issuing the necessary local permits for construction. If you have any questions or desire additional information, please advise. I will be happy to respond accordingly.

Joseph E. Kub, P.E.

XC: Eastman
